Pebble May Expand Property Near Illiamna

9/24/2010

The Pebble Partnership may consider a possible expansion of its proposed mine near Illiamna. The Mining News Weekly reports that the partnership between Anglo-American and Northern Dynasty has an option to increase its land position surrounding the current Pebble property.

Full Metal Minerals said the partnership signed an option agreement September 9th to earn a 60 percent interest in the 85,750-acre Pebble South property adjacent to the claims that make up the current Pebble Mine.

It is believed that Pebble-style mineralization trends to the southwest from the Pebble Partnership's massive deposit onto Pebble South. Geochemical and geophysical surveys have delineated 11 promising prospects on the property.
